

## Why Do I Gift People With Shakespeare?

Recently, I began to gift people with Shakespeare, i.e. the Oxford Press Complete Works of William Shakespeare. The reason is not that before it happened I had never seen my boss so happy when he came and asked me if I ordered the Shakespeare for him and that I answered that I ordered it for everybody. (I also realized that he became a happier person afterwards despite the fact that he was already at least okay before that happened.)

But that is beside the point. I gift people with Shakespeare for a very simple reason. I do it because if there is one book that can save the United States, it will be it.

But what am I talking about?

Simply look around yourself and you will agree with me. Today, America is plagued with only one problem: being shallow and narrow, meaning, their minds and eye-sights are narrow and their hearts and wisdoms have no depth, and therefore, cannot agree with one another any longer.

If you still do not agree, only look around and over the Internet and you will be wondering why Americans fight one another all the time on any issue: be it gun control, foreign policy, immigration, drugs, birth control ... you name it. I am not saying that people need to agree with one another like a bunch of ants. **But rather, when they do not agree with one another – that is what democracy is all about – what they should do to achieve the best results for everybody – that is also what democracy is about.**

In other words, the United States of America is no longer the Beacon of Democracy for the world. Rather, it has become the Symbol of Anti-Democracy, Anti-Humanity, and Anti-Wisdom -- actually Anti-Everything.

I believe the Great American Renaissance Movement is long overdue! This country needs to rejuvenate and re-energize itself in every way. To gain width and depth in wisdoms, my way is to recommend people to read Shakespeare. And, therefore, I have been ordering the Oxford Press Complete Works of William Shakespeare through Amazon to send to people.

If you agree with my belief, find out your way and start doing it.
